Restore

Parco Campo dei Fiori - nature conservation

This combined project contributes to the financing of a certified climate project and additionally supports nature conservation in Italy. For every tonne of CO2 saved through the contribution via a certified climate project, a financial contribution will go towards the reconstruction of the Regionale Campo dei Fiori in Italy. In this way, we can restore forest ecosystems that were devastated by a storm in 2020.

Currently, the reconstruction of the Regionale Campo dei Fiori is combined with a certified social impact project in India (climatepartner.com/1607). This project enables local women to purchase clean energy products such as solar lamps and water filters. Combined climate project to date: solar energy, Karnataka, Uttar Pradesh, and Maharashtra, India (climatepartner.com/1429).

Italy

France

planting

France - tree planting

This combined project contributes to the financing of a certified climate project and additionally supports tree planting in France. For every tonne of CO2 saved through the contribution via a certified climate project, we plant one tree in France. This way, we promote the conversion of structurally poor forests and monocultures into more resilient mixed woodlands that can better adapt to changing climate conditions.

Currently, tree planting in France is combined with a certified social impact project in India (climatepartner.com/1614). The project enables women microentrepreneurs in rural areas of India to access funding for improved cookstoves and solar lamps. Combined climate projects to date: forest protection, Lábrea, Brazil (climatepartner.com/1475), forest protection, Madre de Dios, Peru (climatepartner.com/1057) and forest protection, Mataven, Colombia (climatepartner.com/1402 and climatepartner.com/1288).

Reduction

Belgium - tree planting

This combined project contributes to the financing of a certified climate project and additionally supports tree planting in Belgium. For every tonne of CO2 saved through the contribution via a certified climate project, we plant one tree in Belgium. This way, we promote the conversion of structurally poor forests and monocultures into more resilient mixed woodlands that can better adapt to changing climate conditions.

Currently, tree planting in Belgium is combined with a certified social impact project in India (climatepartner.com/1614). The project enables women microentrepreneurs in rural areas of India to access funding for improved cookstoves and solar lamps. Combined climate project to date: forest protection, Lábrea, Brazil (climatepartner.com/1475).

Netherlands

Afforestation

Netherlands - tree planting

This combined project contributes to the financing of a certified climate project and additionally supports tree planting in the Netherlands. For every tonne of CO2 saved through the contribution via a certified climate project, we plant one tree in the Netherlands. This way, we promote the conversion of structurally poor forests and monocultures into more resilient mixed woodlands that can better adapt to changing climate conditions.

Currently, tree planting in the Netherlands is combined with a certified wind project in Turkey (climatepartner.com/1525). The wind turbines generate renewable energy, which is fed into the local grid and thus reduce the need for fossil energy sources. Combined climate project to date: forest protection, Lábrea, Brazil (climatepartner.com/1475), forest protection, Mataven, Colombia (climatepartner.com/1402 and climatepartner.com/1288).
